MDM
## MOBILE DEVICE MANAGEMENT

Control your IoT digitisation before it affects your bottom line

MDM is a mobile management software to assist in controlling the use of the device. Businesses with mobile workforce require secure devices to ensure responsible usage, improve productivity and reduce maintenance cost. Devices can be Locked down by allowing access to the required applications and preventing users from making any unintended changes in the solution.

Industries:

Public Sector	Agriculture	Hospitality	Transport & Logistics	Mining
Health Care	Cleaning	Facility Management	Construction	Security

KEY FEATURES

More Productive Workforce	Less Down Time
Protection of Company Policies	Device Lockdown & Kiosk Mode
Content Management	Restrict Access on Devices
Security Management	PC Control Management
